

Green Shape Standard

Systematics of applicable documents and versioning

Related document 22

The Green Shape Standard consists of the certification program and its associated documents ("mgD").

The accompanying documents are structured and versioned according to a clear system.

The numbering follows the system described below:

Serial no.	Assignment of documents
00 to 19	Product-related documents
20 to 29	Documents relating to the program owner Green Shape Association
30 to 39	Documents relating to the Green Shape warranty mark
40 to 49	Documents relating to the certification body

The documents are managed by the program owner.

It contains at least:

- Title of the document
- Date of creation
- Author
- Valid from date
- Version number

All documents contain the currently valid version number in the format "Vx.y".

"x" refers to the main version of the document. Changes to the content (technical changes) result in a new version.

"y" refers to a subversion of the document. Editorial changes, clarifications regarding interpretation, or additions to improve readability do not result in a new main version, but only in a new subversion of the document.

GS3.1 mgD 22 Classification of applicable documents V1.0

Version 1.0 – April 2025. Created by: Green Shape e.V.
